GO RESILIENT ENVIRONMENTAL POLICY

GO Resilient's environmental policy is focused on:

- Minimizing the overall impact that the thermoplastic materials used in the manufacture of our product ranges has on the environment.
- Protecting the earth's natural resources and habitat.

GO Resilient ensures:

- We manage our production operations to comply with relevant environmental regulations.
- Our manufacturing processes are conducted in a manner that prevents pollution and conserves resources.
- We design and continually upgrade machinery, both used in our own manufacturing and that sold on, to incorporate the latest energy efficiencies.
- The responsible design of all products so as to meet our environmental objectives.
- The efficient use of all raw materials to reduce waste and to use wherever possible plastic materials that is capable of being recycled.
- The selection of raw materials that are environmentally approved and certified where appropriate.
- The minimal use of packaging on all goods and the support of the EC directive on packaging and packaging waste.
- The partnering with vendors who demonstrate sound environmental policies and practices.

This policy will be reviewed to reflect best practices and changes in legislation. Safety data sheets on all our products are available on request.
